Company Overview

Established in 2020, Pethers Painting & Decorating has grown from a hands-on residential painting business into an experienced team delivering structured, high-quality repaint projects across South East Queensland.

For interior repaints, we combine careful preparation, premium low-VOC products and organised site systems to deliver clean, consistent finishes while minimising disruption inside the home.

Clients value our clear communication, tidy work habits and professional team. Fully licensed and insured, we plan, supervise and complete each project to a consistent standard from initial consultation through to final handover.

About The Team

Ethan Pether

Managing Director

Ethan established the business after years of hands-on painting experience, with a focus on quality preparation and durable finishes for coastal homes. His leadership centres on clear communication, strong systems, and raising the standard of repaint work across South East Queensland.

Dirk Quinch

Operations Manager

Dirk oversees project readiness, daily workflow, quality control and final sign-offs. He brings structure to each repaint, supports the foremen and helps keep projects organised from pre-start through to handover.

Darren

Foreman

Darren values structure, clear planning and keeping projects moving according to schedule. He takes pride in coordinating the team, maintaining consistent standards and working through challenges to deliver a well-organised result.

Brendan

Foreman

Brendan is a practical and supportive leader who enjoys helping younger painters develop their skills. He focuses on teamwork, clear direction and making sure every stage of the project is completed properly.

Thafarell "Tuffy"

Foreman

Thafarell is an experienced all-round painter who particularly enjoys residential repainting. He is comfortable working in clients' homes and brings a calm, respectful approach while maintaining a strong standard of preparation and finish.

Core Services — Interior Repaints

Interior Painting Services

- Ceilings
- Walls
- Doors & Door Frames
- Skirting Boards & Trims
- Architraves

- Feature Walls
- Kitchens, Bathrooms & Laundries
- Stairways, Voids & High-Access Areas
- Plaster Patching, Filling & Surface Repairs

- Full-time painters (no subcontractors)
- Systems designed for minimal disruption and consistent outcomes

Colour Consultation

- Professional colour guidance by Eileen from In Style and Colour
- Recommendations tailored to lighting, décor & layout
- Final colour confirmation completed before scheduling

Process & How It Works — Interior Repaints

Initial Enquiry

Our team gathers the key details, discusses the areas involved and provides an initial indicative price before a site assessment.

Site Visit & Assessment

Our administration team arranges the visit. Our team assesses surfaces, preparation needs and the exact scope required for an accurate proposal.

Proposal & Scope

Our team prepares a clear proposal covering areas included, preparation, products, colour schedule and payment structure. The proposal is valid for 30 days.

Colour Consultation

Eileen from In Style and Colour helps select colours suited to the home, lighting, décor and existing finishes.

Scheduling & Pre-Start

A booking deposit is required to secure the project. Our operations team then confirms timing, access, colours and pre-start details.

Site Set-Up & Preparation

At commencement, you meet your foreman and review the project requirements. Flooring, furniture and fixtures are protected before patching, sanding, masking and preparation begin.

Process & How It Works — Interior Repaints

Painting & Application

Our employed team completes the repaint using the agreed preparation systems and coatings. The home stays organised and the Operations Manager oversees delivery and quality.

Final Checks & Walk-Through

Your foreman completes a detailed inspection before the Operations Manager carries out final operational sign-off. We then walk through the home with you and address any required touch-ups.

Clean-Up & Handover

Protective coverings and equipment are removed, the home is cleaned and the final handover confirms the completed scope and care guidance.

Process & How It Works — Interior Repaints

Interior Repaint Preparation

Does the furniture need to be removed or moved away from the walls?

Yes — a vacant or cleared space is preferred.
It reduces labour costs, improves efficiency, and delivers cleaner results.

If a full clear-out isn't possible, we can work around items or help organise storage.

Will the home be occupied or vacant during the repaint?

We can work with either, but a vacant home allows for smoother progress and minimal disruption.

Are carpets, rugs and flooring protected or removed?

We will protect all flooring.

If flooring is being replaced, it's best to remove it before painting for the cleanest finish.

Have curtains, blinds, pictures, and wall hangings been removed?

These should be removed prior to our arrival to allow full wall access and efficient preparation.

Are pets secured during the repaint?

Yes — pets must be secured for safety and to prevent interruptions.

Do we have access through all rooms being painted?

Please ensure all rooms are unlocked and ready for the team.

Do you have access codes or alarm instructions we need?

If your home has alarms, gates, or coded access, please provide instructions before the start date.

Have fragile or valuable items been removed from the work areas?

Yes — all valuables, electronics, and fragile items should be removed for protection.

Are all lights working for finish checks?

Good lighting is essential for assessing coverage and final details, so please ensure lights are operational.

Frequently Asked Questions — Interior Repaints

Are your painters subcontractors?

All of our painters are full-time team members. We do not use subcontractors.

Do rooms need to be emptied?

Preferably. A cleared space improves access, efficiency and finish quality. If needed, we can work around agreed items.

Can you work while we're living in the home?

Yes. We can stage the work to reduce disruption, although a vacant or mostly cleared home allows smoother progress.

Will furniture and floors be protected?

Yes. Flooring, furniture and fixtures remaining in the work area are covered and protected.

Do you repair damage before painting?

Yes. Patching, filling, sanding and stain-blocking are completed where required within the agreed scope.

Do you help with colour selection?

Yes. We organise a professional colour consultation with Eileen from In Style and Colour.

How long will my repaint take?

Timeframes depend on the size of the home, preparation requirements and access. Your proposal includes an indicative timeframe, with dates confirmed once scheduling is finalised.

Will it smell?

We use low-VOC, low-odour interior products. Any light paint smell is managed with ventilation and clears as the coatings cure.

Do you handle high-access areas?

Yes. Stairwells, voids and high ceilings can be included, with access requirements confirmed during the site assessment.

PETHER'S

PAINTING & DECORATING

Interior

Thank You

With an experienced team and a commitment to proper preparation, Pethers Painting delivers clean, consistent interior repaints.

Every project is managed with clear communication and respect for the home.
